## New Build Conversion Renovation Extension

Protek specialise in providing insurance and structural warranties for people undertaking new builds, renovations, extensions or conversions. We understand the risks you face and will give you all the assistance you need to get the right cover in place for your project.

If you are undertaking a new build, managing or assuming responsibility for a project prior to completion, you will need to consider the insurances outlined in this information guide.

**Ordinary home insurance will not provide sufficient cover for an extension or renovation project and often specifically excludes these projects - which is why Site Insurance is so important.**

The sum insured needs to be sufficient to cover the rebuilding cost of the whole project should it be destroyed by fire upon completion.

Insurance for a renovation, extension or conversion project takes into account two key elements - the existing structure and the new conversion works. The sum insured needs to be sufficient to cover the rebuilding cost of the whole project should it be destroyed by fire upon completion.

Quotes and more information are available at our website [www.proteksselfbuild.co.uk](http://www.proteksselfbuild.co.uk) or alternatively you can call to speak to one of the team on 0333 456 8030

**Your Project, Covered Your Way**

# PROTEK SITE INSURANCE

Protek site insurance provides optional levels of cover and flexible policy periods for all project types which can be specifically tailored to your needs during the quote process. You can also buy short term top up policies if you run out of cover towards the end of the build. Whether you are making structural alterations or extending to the side or into the roof we have a solution for you.

**Policy Period (months):**  
**Excess:**

**Flexible from 3,6,9,12,18, 21 & 24**  
**Flexible from £250 - £1000**

**New Build**

**Conversion**

**Renovation**

**Extension**

# PROTEK STRUCTURAL WARRANTY

Protek self build structural warranty covers defects in the design, workmanship, materials, and components of the project should they fail and cause major damage or weatherproofing issues to the completed housing unit.

The warranty covers the new works and consequential damage.

<b>Policy Period:</b>	<b>10 Years</b>
<b>Excess:</b>	<b>£1000</b>
<b>Structural Insurance:</b>	<b>Sum insured up to £750,000</b>
<b>Contaminated Land:</b>	<b>Sum insured up to £750,000</b>
<b>Building Regulations (Health and Safety of Occupants Cover):</b>	<b>Cost of original works</b>
<b>Alternative Accommodation:</b>	<b>Included</b>
<b>Professional Fees:</b>	<b>Included</b>
<b>Removal of Debris:</b>	<b>Included</b>

## **Technical Audit / Building Control**

In order to provide you with the 10 year cover, we check the design, workmanship, materials and components in the form of a plan and calculation check and a series of site based inspections. We can also incorporate the provision of Building Control into the process, often saving you money. The warranty is available irrespective of whether you are using the local authority or an approved inspector to carry out building control.

## **Stage Payment Certificates**

We can arrange to provide stage payment certificates if required.

**New Build**

**Conversion**

**Renovation**

**Extension**

# Your Project, Covered Your Way

## What to do next...

It's a good idea to think about how you are going to carry out your project, who is going to be responsible for what elements and then piece together what you are going to need to insure.

Even if you are using a builder to carry out the project it's worth considering the cost of arranging the insurance and warranty yourself - as it may be cheaper than the builder including it as an item in their quotation to you.

If you are unsure what you need to arrange, our quotation system will guide you by asking you the relevant questions you need to consider, and of course our staff are on hand to give you the help you need.
